| NAME OF ORGANIZATION CRA (ROV) | | DATE RECEIVED |
| NAME OF PERSON SUBMITTING IDEA ROV STAFF | WORK PHONE # | EMAIL |
| TITLE OR SUBJECT OF COST SAVING IDEA Department & Countywide - Turn lights off in rooms when not in use rather than allowing motion sensor to detect. | | |
| EXISTING CONDITION (if more space is needed, please summarize and attach additional sheet/s) During the Energy crisis a few years ago all the existing light switches were replaced with motion sensor detectors which will automatically turn lights on and off based on detecting motion. | | |
| SUGGESTED COST SAVINGS IDEA (if more space is needed, please summarize and attach additional sheet/s) We have some rooms in our office which are only used at break (kitchen) used very seldom (library) and our computer room (used daily but not all day). If we had the old fashioned light switches re-installed staff could turn the light off when they were leaving the room instead of waiting for motion light to time out and shut the light out. | | |
| BENEFITS OF IDEA (Cash savings, revenue, labor, space, service) (if more space is needed, please summarize and attach additional sheet/s) Hopefully some savings would be realized by employees turning off lights when not needed instead of the light staying on up to 10 minutes after the room is not being used. | | |
| ISSUES (legal, costs, MOU, space) THAT COULD POTENTIALLY LIMIT IMPLEMENTATION OF THIS IDEA | | |
