California Department of Food and Agriculture Organic Program
ORG100-FSL (Rev 12/07)
Facility Substance List

Registration number: ____-_____
Assigned by the Principal County:

In lieu of completing this document I have attached (name of attachment) _____ which provides the same information this document requests.

The National Organic Program allows for the use of pest management inside buildings and on facility grounds that are separate from fields. Use this form to document the substances used in and around where organic products are being stored or handled.

Note: When a contracted Pest control company is used to control pests the organic operation is still required to keep records and know what is being used in the facility. If more than one facility list each facility and substances used.

Indicate the date material was applied or frequency of applications, and facility ID

Indicate the generic identity of the material. ie, Pest control, sanitizer, rodent control ect..

Indicate the source of the product ie, Pest control co.name, Farm supply co. name ect..

Indicate the brand name of the product used.

Indicate the total amount of product purchase, either in tons or number of packages and size of packages. Or treatment identifiers.

Indicate the amount of product used in gallons, or ounces, or number of traps, or pounds of product used.

Date & Facility	Material	Source	Brand Name	Rate	Total
