

# Monte Rio Wastewater Symposium

## October 16, 2010

### Public Comment

Need public input and discussion on what individuals can do on their septic systems

Need to be specific in identifying problems before identifying solutions - where?

The Task Group is not well balanced with stakeholder interests.

Regulators create hammer. Can they say what can be done and the County do it,  
which would avoid creation of new governance entity?

Concern that local control might not work for Monte Rio. Perhaps use PRMD.

Forming own district is setting self up for fines, etc.

Is there a pre-conceived Agenda for getting district formed and taking responsibility  
away from County?

Some feel the need for local control to get local desires.

Need solutions all can afford.

Need discussion regarding governance.

Lack of solution could be issue for homeowners obtaining financing.

Wants more public meetings (exchange).
