CAD Mapping Request

Message from Kevin Lacefield of CAD GIS:

Most of the mobile home parks have named streets, however most of these streets are private and therefore do not exist in our data. This is causing some issues with the current map file. To fix these problems Matthew and I would like to ask for some help. Our request is a list of all mobile home parks that are in each Fire District and their corresponding map page number from the agencies Fire Run Book. This information will allow us to fix these issues in a more timely manner.
