

REDCOM – TRAINING BULLETIN

DATE: **SEPTEMBER 18, 2003**

SUBJECT: **SRA/MTZ FIRES**

The following procedure will be in effect as of October 1, 2003:

Once it is determined that an incident is in a SRA/MTZ area and that CDF is the dispatch center for the incident, the following shall occur. CDF has requested that for the remainder of the year once units go responding on the assigned control channel, that they will be instructed that " CDF is the dispatch center for this incident, switch to CDF local West". Units responding to the incident shall advise CDF of their response and travel to and arrive at scene with CDF. This will allow for accountability and when canceling units, no one should be missed. When released from an incident the units shall advise CDF and switch to the assigned CRO to advise the CRO to status them available and switching over to REDCOM. Questions regarding this procedure shall be directed to CDF St Helena Battalion Chief Mike Mickelson at 967-1409.
