

**APPENDIX E**  
**SPILL PREVENTION FUELING**  
**AND LUBRICATION PLAN**

**SYAR INDUSTRIES, INC. – ALEXANDER VALLEY  
SONOMA COUNTY, CALIFORNIA  
SPILL PREVENTION FUELING AND LUBRICATION PLAN**

**A. Functions Performed**

Equipment involved in skimming operations will be fueled in the field. Fueling will occur on the terraces, away from the River and the high bank.

**B. Equipment Used**

A fuel truck is used to supply equipment. Fueling will occur on the terraces, away from the River and the high bank.

**C. Personnel Involved**

1. Site safety officer – (To be assigned)
2. Fuel truck operator as trained by the site safety officer.

**D. Emergency Equipment Available**

1. Fire Extinguisher.
2. Shovel.
3. Broom.
4. Two bags of absorbent.
5. Empty 55 gallon drum for containing contaminated soil or absorbent.
6. Containment booms and absorbent pads.

**E. Emergency Response to Spills or Releases**

1. Ensure that all persons are protected from dangerous conditions.
2. Limit spill volume or area covered.
  - (a). Use shovel to construct berms for containment.
  - (b). Spread absorbent.
3. Contact the Plant Manager.
4. If help is needed, call 911 for response from the fire department.
5. If it is determined that the release could threaten human health or the environment, call the Sonoma County Department of Health Services at (707) 565-4700, the Office of Emergency Services at (800) 852-7550, and the fire department at 911.
6. Clean up contaminated soil, sample for laboratory testing, and place the soil in 55 gallon open-top drum until proper disposal procedures are determined based on laboratory analysis.

7. If petroleum spills into a waterway, use containment booms and call for a vacuum truck. In addition, notify the North Coast Regional Water Quality Control Board at (707) 576-2220.
8. The Plant Manager must prepare a report of activities occurring, determine the cause of the spill or release and make recommendations for preventing a future occurrence.

#### **F. Employee Training**

1. Fuel truck operator is trained on the employee practices listed below.
2. All employees on site to be trained in the use of spill clean-up equipment and fire extinguishers.
3. All employees on site to be trained in the use of communications equipment.
4. All employee training will be documented .

#### **G. Employee Practices**

1. Never leave hoses unattended.
2. Avoid spills and drips.
3. Inspect vehicles and all containers daily for leaks. Report any leaks to your supervisor immediately.
4. All fueling of mobile equipment will be performed on the terraces, set back from the high bank of the River.
5. Equipment maintenance will occur at the processing plant at Healdsburg.
